

PLANT HAMS HALL 2022 GENDER PAY GAP REPORT

BMW Group Plant Hams Hall produces the latest generation of BMW Twin Power petrol engines, playing a key role in BMW Group's global production network. At the time of the 2022 reporting period, BMW Hams Hall Motoren GmbH employed 894 associates.

WHAT IS THE GENDER PAY GAP?

The Gender Pay Gap is the difference between the average pay and bonuses of all men and women across an organisation.

The Gender Pay Gap does not measure equal pay, which relates to what women and men are paid for performing equal work.

OUR RESULTS.

The Gender Pay Gap Data for BMW Hams Hall Motoren GmbH on 5 April 2022 is as follows:

MEAN AND MEDIAN PAY AND BONUS GAP		
	MEAN (average)	MEDIAN (Middle)
Gender Pay Gap	10.2%	7.1%
Gender Bonus Gap	16.5%	7.3%

PROPORTION OF ASSOCIATES WHO RECEIVED A BONUS:

SALARY QUANTILES

The proportion of males/females in each quartile pay band is as follows:

PLANT HAMS HALL

2022 GENDER PAY REPORT

UNDERSTANDING THE GAP.

As is typical of many manufacturing companies, our workforce is comprised of considerably more men than women. At Plant Hams Hall our associates are 94% male and 6% are female.

There are several factors which drive our Gender Pay Gap results, however we have identified three key areas;

Working patterns. There is a higher proportion of men working in production and engineering roles who operate on shift patterns which attract a shift premium payment.

Women in Senior Leadership Roles. We currently have very few women in leadership roles at Plant Hams Hall.

Part time roles. There is a higher proportion of women than men who work part time. Whilst this has no impact upon a women's hourly basic pay, it does impact other elements of total remuneration, including bonus payments.

We have several ways in which we promote consistency in Reward between men and women. These include spot rates in non-management roles and a structured approach to pay and bonus determination for management associates.

CLOSING THE GAP.

We are focused on building a diverse and inclusive work environment, but we are realistic that meaningful change will take time.

Over the years of reporting our Gender Pay Gap results we have seen progress in closing the gap.

However, we also understand that with the small number of women in senior leadership positions, our results are vulnerable to any changes within our female population, such as transfers within our UK or global network.

As a Plant we understand the real benefits of a diverse workforce and are committed to:

✓ **Encouraging women into our workforce**

We focus on our Future Talent programmes as a key area to address the current gender imbalance in our workforce.

✓ **Raising the profile of women at the Plant**

By raising the profile of our female associates through annual events such as International Women's Day and our internal BMW Diversity week we aim to encourage and engage our women at the Plant and celebrate the impact and contribution they make to our business.

✓ **Removing any barriers to development**

We regularly review our policies and processes to ensure that we are removing any barriers for women to fulfil their potential at the Plant. We offer flexible working opportunities and ensure robust succession planning activities are undertaken to maximise opportunities.

.....

We continue to support the UK government's drive for companies to be more transparent on gender pay issues and confirm that the data is accurate and in line with The Equality Act (Gender Pay Gap Information) Regulations 2017.
